REVIEW REPORT TO THE BOARD OF DIRECTORIES OF TALAAT MOSTAFA GROUP HOLDING COMPANY "TMG HOLDING" (S.A.E)

We have performed a review of the accompanying consolidated financial statements of **Talaat Mostafa Group Holding Company "TMG Holding" (S.A.E)** represented in the financial position as of 30 September 2008 and the related consolidated statements of income, changes in shareholders' equity and cash flows for the Period from 3 April 2007 to 30 September 2008. These financial statements are the responsibility of the Company's management. Our responsibility is to issue a report on these financial statements based on our review.

We conducted our review in accordance with the Egyptian Standard on Auditing concerning the review. This standard requires that we plan and perform the review to obtain reasonable assurance about whether the financial statements are free of material misstatement. A review is limited to the implementation of analytical procedures on the financial data and obtaining information from the Company's management, accordingly, it is limited in scope compared with the audit procedures that are performed under the Egyptian Standards on Auditing for the purpose of expressing an opinion on the financial statements, accordingly, we do not express such an opinion.

Based on our review of the consolidated financial statements of **Talaat Mostafa Group Holding Company "TMG Holding" (S.A.E)** as of 30 September 2008, we did not note any material adjustments that should be made to the consolidated financial statements to conform to the Egyptian Accounting Standards.

This report is intended solely for management purposes and should not be used for any other purpose.

*** Alexandria for Real Estate owns 60% ofAlexandria for Urban Projects

3 SIGNIFICANT ACCOUNTING POLICIES

The main accounting policies that used in preparing the consolidated financial statements are:

Basis of consolidating the financial statements

- The financial statements of the holding company and the subsidiaries have been prepared according to the cost method except for some investments that have been evaluated with fair value in accordance to the Egyptian Accounting Standards and the prevailing laws and local regulations
  The same accounting policies and basis that are used in preparing the interim financial statements are applied.
- Similar assets, liabilities, equity, revenues and expenses items were consolidated in the holding company and its subsidiaries after eliminating the following:

a) The Holding Company's cost of investment in every subsidiary company against decreased it from the equity in the subsidiary company at the acquisition date and record the different between the investment cost and the holding company share in the book value of the subsidiaries equity as goodwill.
On yearly basis at the balance sheet date , goodwill is to be revaluated to decide wither to reduce the value of the goodwill in case of the decrease of the holding company fair value in the subsidiaries equity and record the decrease in the consolidated income statement.

b) The Inter-company transactions among the companies of the group especially:
- The current accounts among the companies.
- Notes Receivable /Payable among the companies.

Significant Accounting Policies (continue)

c) The sales, expenditures, revenue and dividends among the companies of the group during the period

d) The unrealized profit at the consolidated balance sheet date among the companies of the group, which might appear in the assets balances in the consolidated balance sheet date as inventory and fixed assets.

e) Any differences between debit and credit balances resulting from the inter-companies transactions, which were recorded in one company and not in the other company's records, were eliminated.

f) The minority interest appears as a separate caption in the consolidated financial statements as a percentage calculated on the basis of the ownership of the holding company in the subsidiaries.

Foreign Currency Translations

Transactions in foreign currencies are recorded at the rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated to Egyptian pound at the rate of exchange ruling at the balance sheet date. All differences are taken to the income statement

Property, plant and equipment

a) **First measurement and recognise**

Property, plant and equipment is stated at cost less accumulated depreciation and any impairment in value.

The cost includes all direct costs related to the acquiring of the asset, regarding the built internally assets , the cost includes the cost of materials, direct labour and all other direct costs that is required until it is ready to be used and also the cost of elimination the asset and fix the construction site

b) **Depreciation**

Depreciation is calculated on a straight line basis over the estimated useful lives of the assets as follows:

	Years
Buildings & constructions	20
Motor Vehicles	5
Tools & equipments	8
Furniture and other assets	8-10
Computers	3-8

The carrying values of property, plant and equipment are reviewed for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. If any such indication exists and where the carrying values exceed the estimated recoverable amount, the assets are written down to their recoverable amount, being the higher of their fair value less costs to sell and their value in use.

Expenditure incurred to replace a component of an item of property

Plant and equipment that is accounted for separately is capitalised and the carrying amount of the component that is replaced is written off. Other subsequent expenditure is capitalised only when it increases future economic benefits of the related item of property, plant and equipment. All other expenditure is recognised in the income statement as the expense is incurred.

Reclassify the real estate investments

Real estate's that built for future use is recorded as real estate investments under fixed assets class till it is finished, and then re-measure its fair value, recognising any profit or loss in the income statement.

The real estate that transferred from real estate occupied by the company to real estate investments to be re-measured with the fair value and reclassified as real estate investments.
The profit results from the re-measurement to be recognised in the equity and any loss to be recognised in the income statement.

Significant Accounting Policies (continue)

Project under construction:
Projects under construction represent the amounts that are paid for the purpose of constructing or purchasing fixed assets until it is ready to be used in the operation, upon which it is transferred to fixed assets. Projects under construction are valued at cost.

Investments

Investments in associates
Investments in associates are accounted for using the Equity method except for when investment are classified as available for sale according to the Egyptian accounting standards No. 32 None current assets held for sale and discontinued operations, these associates companies are those companies which the company has a major influence and which are not subsidiaries or joint venture. Investments in associates are recorded in the Balance sheet with cost.

in addition to company share of any changes in the net assets of associates company after deducting any impairment losses, the company's income statement reflect its share in the result of associates companies.

These investment include company's share in the profit of subsidiaries according to their financial statements which ratified by their auditors and these investments are diluted by company share form the dividends declared according to investee's General Assembly Meeting decisions.

The losses or revenues results from the transactions between the company and its affiliates are eliminated in the range of the company's share in the affiliated companies.

Available-for-sale investments
Available-for-sale investments are recognised and derecognised, on a trade date basis, when the Company becomes, or ceases to be, a party to the contractual provisions of the instrument. They are included in non current assets unless management intends to dispose of the investments within 12 months of the balance sheet date.

Investments designated as available-for-sale investments are initially recorded at cost (except for non listed investments in the capital exchange market) and subsequently measured at fair value. Changes in fair value are reported as a separate component of equity. Upon elimination of investments, the previously reported as "cumulative changes in fair value" within equity is to be included in the income statement for the period, except for impairments loss , and for non listed investments is to be recorded at cost less impairment loss.

Trading Investments
Financial investments are classified as held for trading if they are acquired for the purpose of selling in the near term. They are measured at fair value, any changes in the fair value is taken to the income statement as a separate line item

Investments in Bonds held to maturity
Investments in Bonds held to maturity with fixed or determinable payments that are not quoted in an active market, are carried at adjusted cost which represent the nominal value plus the bond premium or discount and the premium / discount to be amortized by using the effective rate method, the amortization amount to be added to the bonds revenue in the income statement

Goodwill
Goodwill represents the increase of the acquisition cost of the shares of the subsidiaries companies with the company share in the fair value of the net assets of those companies at the date of acquisition.Goodwill is reviewed for impairment, annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired and the impairment cost to be charged to the income statement of the financial period.

Significant Accounting Policies (continue)

Inventories
Inventories are stated at the lower of cost or net realizable value. Cost is those incurred in bringing each product to its present location and condition as follows:

- Raw materials, spare parts, supplies and packaging materials: at cost using the weighted average method.
- Work in Progress and Finished goods Inventory – supplies direct cost and wages addition to indirect expenses according to Normal activate level.
- Net excepted value to be determined based on the estimated sales price less additional expected cost it is built or sold.

Accounts receivable, Debtors and notes receivable
Accounts receivable are stated at original invoice amount. All those amounts are reviewed annually to decide wither there is an indicator for impairment possibility in the assets value.

Credit Balances and accruals
Liabilities are recognised for amounts to be paid in the future for goods or services received, whether billed by the supplier or not.

Separation of assets and liabilities to short-and long-term
Assets which worth collected during the year after the date of financial statements be included within current assets either the assets that collectible date exceed the year date of financial statements be included within long-term assets.

Related party transactions
Related party transactions performed by the Company within its normal business transactions are recorded based on the conditions set by the board of directors.

Employees Pension Plan
The company participates in the social insurance system in accordance to the social insurance laws no. 79 for the year 1975 and its amended and the company share in the social insurance cost to be charged to the income statement according to the accrual basis.

Provisions
Provisions are recognized when a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are discounted using a current pre tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

Revenue recognition
Revenue from sales is recognised when the significant risks and rewards of ownership have passed to the buyer and the amount of revenue can be measured reliably.

The revenue from prepaid service recorded when estimated the result transaction from completion transaction percentage in Balance Sheet date.
Revenue from share profit recorded when there is right to receive it.

Legal reserve
According to the Company's article of association, 5% of the net profits of the year is to be transferred ɒ the legal reserve until this reserve reaches 50 % of the issued capital. The reserve is used upon a decision from the general assembly meeting based on the proposal of the board of directors

Significant Accounting Policies (continue)

Impairment of financial assets
The Company regularly assesses whether there is an indication that an asset could be impaired.

The impairment loss of a financial assets that was measured with the amortized cost is to be measured as the different between the amortized cost of the book value and the present value of the projected cash flow by using the effective rate
The impairment loss related to financial assets available for sale to be calculated by usingthe present fair value.
The remaining financial assets are estimated according to the groups level that have the same credit risk characterises.
Impairment loss is recognized in the income statement Any subsequent reversal of an impairment loss is recognized in profit and loss, to the extent that the carrying value of the asset does not exceed its amortised cost at the reversal date.
If the available for sale asset is impaired, an amount comprising the difference between its cost and its fair value, less any impairment loss previously recognised in the income statement, is transferred from equity to income statement. Reversal in respect of equity instruments classified as available for sale are recognised directly in the equity
A previously recognized impairment loss is reversed when there is a change in the recoverable amount of the asset to the extent of the previously recognized loss.

Impairment of non-financial assets
The company assesses at each reporting date wither there is an indication that an asset may be impaired.
An asset's recoverable amount is higher of an asset's or cash– generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups ofassets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre–tax discount rate that reflects current market assessments of the time value of money and risks specific to the asset. Impairment losses of continuing operations are recognised inthe income statement in those expenses categories consistent with the function of impairment asset except for the property previously revaluated where the revaluation was taken to equity. In this case the impairment is also recognised in equity up to the amountof any previous revaluated.

Treasury stocks
The treasury shares (Company shares) are recorded with the cost and deducted from the owners' equity in the balance sheet. Any profit or loss proceeds of disposing these treasury stocks are being recorded within the owners' equity.

Accounting estimates
The preparation of financial statements in accordance with Egyptian Accounting Standards requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses during the financial years. Actual results could differ from these estimates

Income tax
Taxation is provided in accordance with Egyptian fiscal regulations.

Deferred income tax is provided, using the liability method, on all temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on laws that have been enacted at the balance sheet date.

Significant Accounting Policies (continue)

Deferred income tax assets are recognised for all deductible temporary differences and carry-forward of unused tax assets and unused tax losses to the extent that it is probable that taxable profit will be against which the deductible temporary differences and carry – forward of unused tax losses can be utilised.

Cash flow statement

The cash flow statement is prepared using the indirect method, for the purpose of preparing the cash flow statements , the cash and cash equivalent include cash on hand , cash at bank , short term deposits , treasury bills with maturity date three months or less deducting the bank over draft– if any.

Borrowing

Borrowings are initially recognized at the value of the consideration received. Amounts maturing within one year are classified as current liabilities, unless the Company has the right to postpone the settlement for a period exceeding twelve months after the balance sheet date, then the loan balance should be classified as long term liabilities.

Borrowing costs

Borrowing costs are recorded in the statement of income as financing expenses except the borrowing costs directly related to the acquisition, construction or production of a qualifying assets which is included as part of the cost of the asset.

Expenses

All expenses including operating expenses, general and administrative expenses and other expenses are recognized and charged to the statement of income in the financial year in which these expenses were incurred.

Dividends

Dividends recognized as liability in the period in which the company General Assembly meeting decided to distribute profits.

Earnings per share

Basic earnings per share amounts are calculated by dividing net profit for the period attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares outstanding during the period.
